Overview

The Wayguard identity is built from four elements that work together.

01

Logo

A navy ribbon folds into a road, edged in amber.

02

Logotype

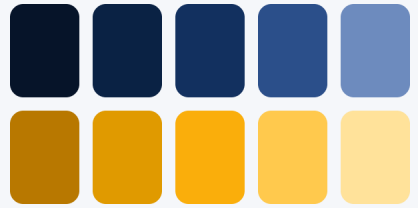

WAY in navy, GUARD in amber, slogan beneath.

03

Typography

Montserrat for headlines, Nunito Sans for text.

04

Color Palette

Navy and amber, each as a five-step scale.

01 Logo

The W is a navy ribbon that folds into a road. Lane marks run down the road and an amber edge frames it: the path ahead, watched over. Four versions cover light, dark and single-color uses.

02 Logotype

WAY is set in Wayguard Navy and GUARD in Road Amber, in a heavy geometric sans-serif. The slogan sits centered beneath in a medium weight. Use the full lockup where space allows, and the mark with wordmark when the slogan would fall too small.

02 Logotype with W Mark

The W road mark can stand in for the first letter of the name, so the logotype still reads WAYGUARD with the road as its W. Use it where the mark and the wordmark would otherwise repeat the same letter.

SUGGESTED BALANCE

Using the Logo

Three rules keep Wayguard recognizable everywhere it appears.

Clear space

Keep a margin equal to the height of the letter A in WAYGUARD on every side. Nothing else enters that zone.

Minimum size

The W mark never drops below 32 px high on screen. The full lockup never drops below 160 px wide.

Keep it intact

Use the supplied vector files. Never recolor, stretch, rotate or add effects, and use the reversed version on dark backgrounds.
